

Boeing Introduces 747-8 VIP Turnkey Service for Premium Long-Haul Travel

- Boeing-backed service provides the world's largest VIP airplane with a new, modern cabin interior
- 747-8 VIP extends the "Queen of the Skies" legacy for high-caliber private transport

LAS VEGAS, Oct. 14, 2025 — Customers seeking a premium option for long-haul private travel can now choose the newest model of the iconic 747 family with a modern VIP interior, Boeing [NYSE: BA] announced today. With its 747-8 VIP turnkey offering, Boeing will provide a full-spectrum concierge service that includes aircraft acquisition, customized cabin interior design and build, delivery and comprehensive in-service support.

The world's largest VIP airplane, the 747-8 features nearly 5,000 square feet of premium cabin space that can be designed and completed with oversight of a dedicated team under a single Boeing contract. The Boeing 747-8 VIP can fly 75 passengers with a range of 8,500 nautical miles, providing nonstop connections from New York to Bangkok and Dubai to Los Angeles.

"The 747-8 continues to serve as a premier VIP and head of state aircraft and discerning customers are interested in continuing this tradition of excellence in private air travel," said Joe Benson, president of Boeing Business Jets. "We're thrilled to continue this legacy with the Boeing-backed 747-8 VIP — delivering a personalized and exceptional flying experience."

Nearly 50 747-8s are in service today, including those used for business and government travel. The 747-8 Intercontinental features advanced technologies from the 787 Dreamliner that reduce its noise footprint, fuel consumption and maintenance compared to earlier 747 models.

With a global service network of services, parts, engineering and maintenance support, Boeing will ensure the reliable operation of 747-8 VIP aircraft for decades to come.

Boeing Business Jets (BBJ) is the industry-leading VIP jet division that brings the best of commercial aviation into the realm of personal air travel. With a wide range of high-performance aircraft, the jets can be uniquely customized for private, business or governmental use. For more information, visit www.boeing.com/bbj.
